

Theory of Change

OUR MISSION: KIN CONNECTS, BROADENS, DEEPENS AND UNLOCKS KNOWLEDGE FOR TRANSITIONS TO A CLIMATE-NEUTRAL

INPUTS

Knowledge from science and practice.

KIN organisation and funding.

Urgent climate challenges from societal practice and governments.

ACTIVITIES

Setting up and organising networks (national and international) of partners in climate transition (including KIN Pact).

Initiating and promoting new programmes in the Netherlands.

Promoting coordination and coherence in climate transition

Initiate and promote initiatives for Global Transitions.

Promoting and driving forward a transition mindset by developing and sharing methods, working practices, tools, etc.

Transition mindset is disseminated and applied fairly.

OUTPUTS

Knowledge questions identified

Societal issues have been converted into transition and knowledge.

Knowledge implementation

Existing insights and results have been translated into action by the actors involved and/or, conversely, into new scientific knowledge.

Knowledge exchange and development

Co-creation and transdisciplinary collaboration focused on practice-relevant knowledge development for climate transitions.

(Knowledge) programmes and collaborations established

New joint programming, collaborations and financing, including for the Global South.

- ^ **Coordination of climate research**
- ^ Knowledge about climate transitions
- ^ (questions, programming and outcomes)
- ^ has been coordinated and consolidated.

OUTCOMES

Researchers

Are able to work transdisciplinarily on just climate transitions

Social stakeholders

Experience greater benefit and value from access to and collaboration with scientists.

Knowledge institutions

Are able to better facilitate/coordinate knowledge sharing and development for climate transitions.

HIGH LEVEL OUTCOME

People and organisations are making greater use of the most relevant knowledge from science and practice when implementing transition-oriented solutions.

IMPACT

Societal partners are more effective in achieving equitable systemic change towards a climate-neutral and resilient society (climate transition).

OUR TARGET GROUPS

Researchers
at universities, colleges and other knowledge institutions

Social stakeholders
in government, businesses, NGOs, civil society organisations

Knowledge institutions
for research, education, funding

KEYWORDS

Transition, transdisciplinary, systems perspective, demand-driven, climate justice, action perspective
